

## Adding a PC to the Rams Domain

Hayden Snead - 2022-08-11 - PC Support

1. Acquire admin password for PC that is being added to the domain.
  1. Go to a PC that has LAPS UI installed.
  2. Run LAPS UI as an administrator.
  3. Enter the PC name that is being added to the domain and click "Search".

The screenshot shows the LAPS UI window. It has a title bar with a user icon and the text 'LAPS UI'. The window contains the following fields and buttons:

- ComputerName**: A text box containing 'Example\_PC' and a 'Search' button to its right.
- Password**: An empty text box.
- Password expires**: An empty text box.
- New expiration time**: A date and time picker showing 'Thursday , August 11, 2022 12:50:46 PM' and a 'Set' button to its right.
- Exit**: A button at the bottom right of the window.

4. The password will appear in the "Password" box.
2. Log on to the PC being added to the domain with admin privileges.
  1. Login with the username "simtech"
  2. Use the password acquired from LAPS.
3. Add the PC to the domain.
  1. Press the windows key or click the start menu and type "This PC".
  2. Right click on "This PC" and select **Properties**.
  3. Select **Advanced system settings** on the right side under Related settings.

4. Select the **Computer Name** tab and click the "**Change...**" button.

5. Select the Domain option in the "Member of" box and enter

Computer Name/Domain Changes

You can change the name and the membership of this computer. Changes might affect access to network resources.

Computer name:  
Example\_PC

Full computer name:  
Example\_PC.RAMS.adp.vcu.edu

More...

Member of

☒ Domain:  
RAMS.adp.vcu.edu

☐ Workgroup:

OK Cancel

**RAMS.adp.vcu.edu.**

6. Select OK and Apply on the properties boxes and the computer has now been added to the RAMS domain.
