

Connect to Horizon using App2Go Citrix Client

Rebecca Tucker - 2025-02-17 - Horizon VDI

This article applies to the following environments:

High Security (Black Environment)	Yes
Standard Security (Gold Environment)	Yes, but if you can run a VCU VPN client, Connect to Horizon using a Web Browser is more optimal

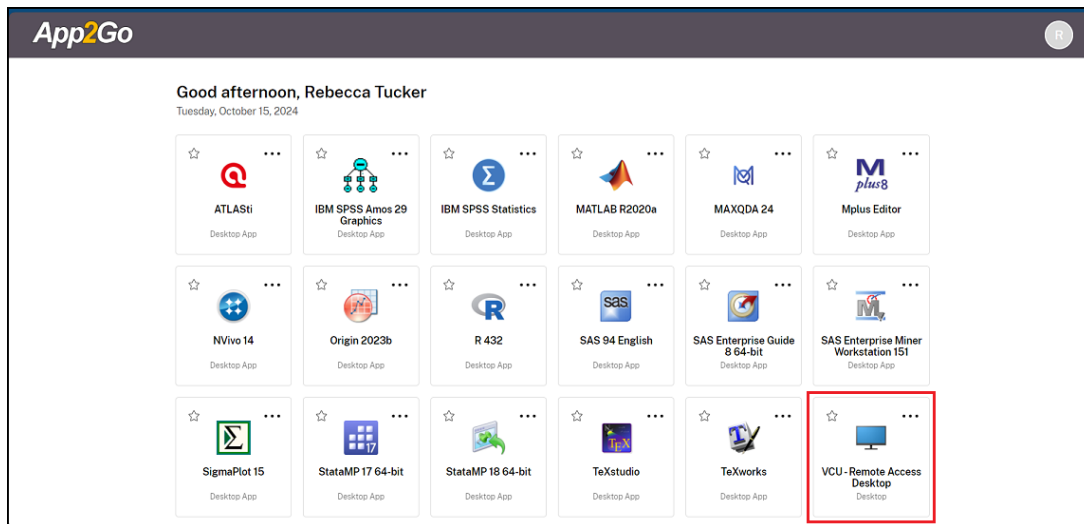

Open a web browser and navigate to app2go.vcu.edu

Accept the VCU System Usage Agreement

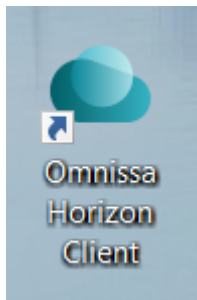

Enter your credentials (use your **elD@vcu.edu** email and **password**) (or select your **vcu.edu** account)

If prompted, select Detect Workspace

Locate and launch the VCU-Remote Access Desktop

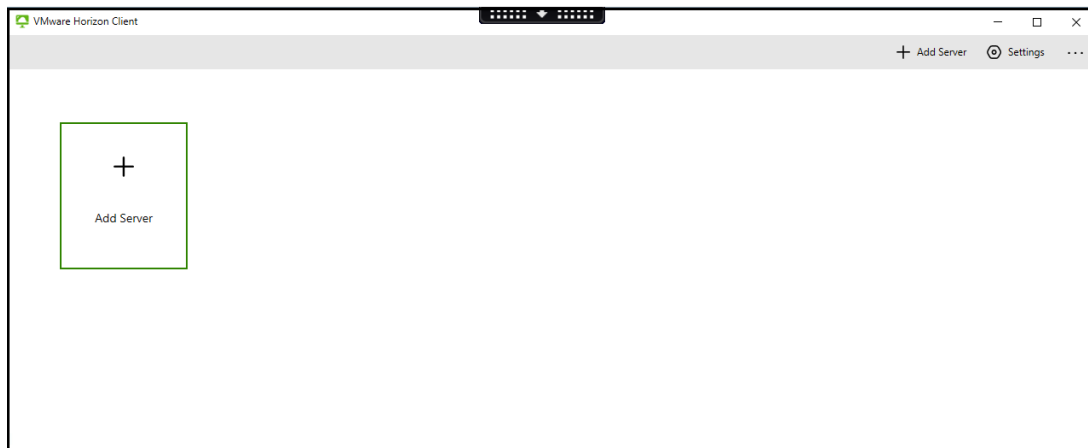

From the desktop, launch the Horizon Client

First time logging on? You will need to define a new connection.

Select Add Server

Name of the Connection Server:

Manually type in: **black.horizon.som.vcu.edu** and click Connect

A screenshot of the "Name of the Connection Server" dialog box. The dialog box has a title bar with the text "Name of the Connection Server". Below the title bar is a text input field with a green border. Below the input field are two buttons: "Cancel" and "Connect".

Enter your credentials (use your **elD@vcu.edu** email and **password**) (or select your **vcu.edu** account) to sign in

The Horizon Client opens and allows selection of the appropriate black high-sensitivity environment.
