

Connect to Horizon using the Native Client

Rebecca Tucker - 2025-01-15 - Horizon VDI

This article applies to the following environments:

| | |
|---|------------|
| High Security (Black Environment) | Yes |
| Standard Security (Gold Environment) | Yes |

If this is your **first time** connecting to Horizon on this computer, please select the appropriate link below for additional setup information.

- [Setup Horizon native client on a VCU-managed Windows computer](#)
- Setup Horizon native client on a VCU-managed Mac computer
- [Setup Horizon native client on a VCU Health-managed Windows computer](#)
- [Setup Horizon native client on a personal device](#)

If this is **not** your first time connecting to Horizon:

Please ensure the following clients are installed and running/enabled:

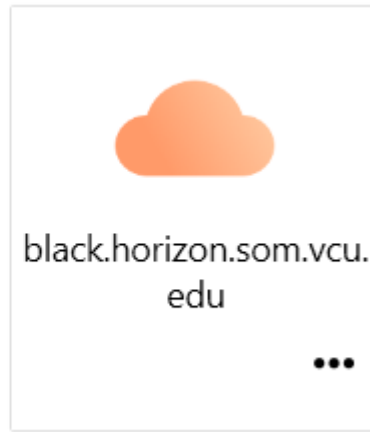

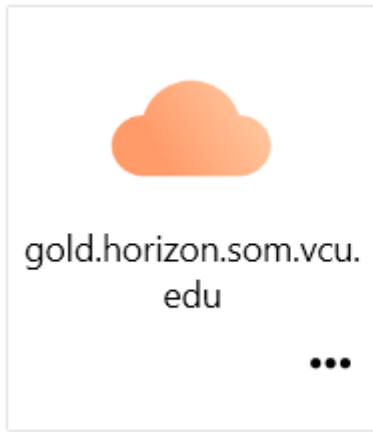

| | |
|---|--|
| High Security (Black Environment) | Zscaler Client |
| Standard Security (Gold Environment) | Zscaler Client OR Cisco AnyConnect VPN |

Then,

Double-click the Horizon Client icon on your desktop to open the Native Client

Double-click the environment to which you are assigned

Enter your credentials (use your ***elD@vcu.edu*** email and **password**) (or select your **vcu.edu** account) to sign in

Accept the VCU Computer and Network Policy to continue

Double-click the icon to open your assigned environment

What's next? [Map a network drive to access your data](#)
