## **Connect to Horizon using the Native Client**

Rebecca Tucker - 2025-10-10 - Horizon VDI

This article applies to the following environments:

If this is your *first time* connecting to Horizon on this computer, please select the appropriate link below for additional setup information.

- Setup Horizon native client on a VCU-managed Windows computer
- Setup Horizon native client on a VCU-managed Mac computer
- Setup Horizon native client on a VCU Health-managed Windows computer
- Setup Horizon native client on a personal device

If this is **not** your first time connecting to Horizon:

Please ensure the following clients are installed and running/enabled:

High Security (Black Environment)	Zscaler Client
<b>Standard Security (Gold Environment)</b>	Zscaler Client OR Cisco AnyConnect VPN

## Then:

- Double-click the Horizon Client icon on your desktop to open the Native Client
- Double-click the environment to which you are assigned

Enter your credentials (use your eID@vcu.edu email and password) (or select your vcu.edu account) to sign in

- Accept the VCU Computer and Network Policy to continue
  Double-click the icon to open your assigned environment

What's next? Map a network drive to access your data
