Cyberark and node.js fight a lot, so i added nodejs' exe dir to the exclusion list in cyberark which fixed a lot...how to do it is

- Go to advanced -> Agent Configuration -> "... " menu -> edit parameters -> exclude files from policy (windows)

The screenshot shows the CyberArk management console. On the left is a navigation sidebar with categories like EPM, Reports, My Computers, Threat Intelligence, Policy Audit, and Advanced. The 'Advanced' section is expanded, showing 'Agent Configuration', 'Server Configuration', and 'User access tokens'. The main panel is titled 'Agent Configuration' and shows a table with 1 result. The table has columns for 'Name' and 'Type'. The single entry is 'General configuration' with a 'Type' of 'Predefined'. There is a 'Create custom configuration' button and an 'Updated at: 1:43 PM' timestamp with a refresh icon.

Name	Type
General configuration	Predefined

**CYBERARK**

**Agent Configuration**

Filter General configuration Type: Predefined

Parameter: exclude Platform: All Apply

5 results for: exclude × Clear all filters

Parameter	Windows	macOS	Linux	Edited	Value
Data collection					
Exclude new files from the Application Catalog and Events Management	*				33 definitions
Policies					
Threat protection excluded applications	*				No definitions
Exclude service accounts from access restrictions	*				On
Agent behavior					
Exclude files from policies (Windows)	*			①	38 definitions
Exclude files from policies (macOS)		*		①	1 definitions
