Cyberark and node.js fight a lot, so i added nodejs' exe dir to the exclusion list in cyberark which fixed a lot...how to do it is

- Go to advanced -> Agent Configuration -> "... " menu -> edit parameters -> exclude files from policy (windows)

The screenshot shows the CyberArk management console. The left-hand navigation pane is open, with the 'Advanced' section selected, which includes 'Agent Configuration', 'Server Configuration', and 'User access tokens'. The main content area is titled 'Agent Configuration' and shows a table with 1 result. The table has columns for 'Name' and 'Type'. The single entry is 'General configuration' with a type of 'Predefined'. In the top right corner of the main area, there is a 'Create custom configuration' button and a status indicator showing 'Updated at: 1:43 PM'.

Name	Type
General configuration	Predefined

CYBERARK Agent Configuration

Filter General configuration Type: Predefined

Parameter: exclude Platform: All Apply

5 results for: exclude × Clear all filters

Parameter	Windows	macOS	Linux	Edited	Value
Data collection					
Exclude new files from the Application Catalog and Events Management	*				33 definitions
Policies					
Threat protection excluded applications	*				No definitions
Exclude service accounts from access restrictions	*				On
Agent behavior					
Exclude files from policies (Windows)	*			①	38 definitions
Exclude files from policies (macOS)		*		①	1 definitions
