Cyberark and node.js fight a lot, so i added nodejs' exe dir to the exclusion list in cyberark which fixed a lot...how to do it is

- Go to advanced -> Agent Configuration -> "..." menu -> edit parameters -> exclude files from policy (windows)

The screenshot shows the CyberArk management console. The left-hand navigation pane is open, with the 'Advanced' section selected, which contains 'Agent Configuration', 'Server Configuration', and 'User access tokens'. The 'Agent Configuration' page is displayed, showing a table with one entry: 'General configuration' of type 'Predefined'. The top right of the page indicates the user is 'VCU School of Medicine' and provides a 'Create custom configuration' button and an 'Updated at' timestamp of 1:43 PM.

Name	Type
General configuration	Predefined

CYBERARK Agent Configuration

Filter General configuration Type: Predefined

Parameter: exclude Platform: All Apply

5 results for: exclude × Clear all filters

Parameter	Windows	macOS	Linux	Edited	Value
Data collection					
Exclude new files from the Application Catalog and Events Management	*				33 definitions
Policies					
Threat protection excluded applications	*				No definitions
Exclude service accounts from access restrictions	*				On
Agent behavior					
Exclude files from policies (Windows)	*			①	38 definitions
Exclude files from policies (macOS)		*		①	1 definitions
