Cyberark and node.js fight a lot, so i added nodejs' exe dir to the exclusion list in cyberark which fixed a lot...how to do it is

- Go to advanced -> Agent Configuration -> "..." menu -> edit parameters -> exclude files from policy (windows)

The screenshot displays the CyberArk management console. The left-hand navigation pane includes sections for EPM, Default Policies, My Computers, Threat Intelligence, and Advanced. The 'Advanced' section is expanded to show 'Agent Configuration', 'Server Configuration', and 'User access tokens'. The main content area, titled 'Agent Configuration', shows a table with one entry: 'General configuration' under the 'Name' column and 'Predefined' under the 'Type' column. A 'Create custom configuration' button is located in the top right corner, along with a timestamp 'Updated at: 1:43 PM'.

CYBERARK Agent Configuration

Filter: General configuration Type: Predefined

Parameter: exclude Platform: All [Apply]

5 results for: exclude × Clear all filters

Parameter	Windows	macOS	Linux	Edited	Value
Data collection					
Exclude new files from the Application Catalog and Events Management	*				33 definitions
Policies					
Threat protection excluded applications	*				No definitions
Exclude service accounts from access restrictions	*				On
Agent behavior					
Exclude files from policies (Windows)	*			ⓘ	38 definitions
Exclude files from policies (macOS)		*		ⓘ	1 definitions
