Cyberark and node.js fight a lot, so i added nodejs' exe dir to the exclusion list in cyberark which fixed a lot...how to do it is

- Go to advanced -> Agent Configuration -> "... " menu -> edit parameters -> exclude files from policy (windows)

The screenshot shows the CyberArk Agent Configuration interface. The left sidebar contains a navigation menu with categories: EPM, Reports, My Computers, Threat Intelligence, CyberArk, Policy Audit, and Advanced. The 'Advanced' category is expanded, showing 'Agent Configuration', 'Server Configuration', and 'User access tokens'. The main content area is titled 'Agent Configuration' and displays a table with 1 result. The table has columns for 'Name' and 'Type'. The single entry is 'General configuration' with a 'Type' of 'Predefined'. A 'Create custom configuration' button is visible in the top right corner, along with a user profile and last sign-in information.

Name	Type
General configuration	Predefined

CYBERARK Agent Configuration

Filter: General configuration Type: Predefined

Parameter: exclude Platform: All [Apply]

5 results for: exclude × Clear all filters

Parameter	Windows	macOS	Linux	Edited	Value
Data collection					
Exclude new files from the Application Catalog and Events Management	*				33 definitions
Policies					
Threat protection excluded applications	*				No definitions
Exclude service accounts from access restrictions	*				On
Agent behavior					
Exclude files from policies (Windows)	*			ⓘ	38 definitions
Exclude files from policies (macOS)		*		ⓘ	1 definitions
