Cyberark and node.js fight a lot, so i added nodejs' exe dir to the exclusion list in cyberark which fixed a lot...how to do it is

- Go to advanced -> Agent Configuration -> "... " menu -> edit parameters -> exclude files from policy (windows)

The screenshot shows the Cyberark Agent Configuration interface. The left sidebar contains a navigation menu with categories like EPM, Reports, My Computers, Threat Intelligence, Policy Audit, and Advanced. The main content area is titled "Agent Configuration" and displays a table with 1 result. The table has columns for Name and Type. The entry is "General configuration" with a Type of "Predefined". There is a "..." menu icon next to the entry. The interface also shows a "Create custom configuration" button and an "Updated at: 1:43 PM" timestamp.

Name	Type
General configuration	Predefined

CYBERARK Agent Configuration

Filter: General configuration Type: Predefined

Parameter: exclude Platform: All [Apply]

5 results for: exclude × Clear all filters

Parameter	Windows	macOS	Linux	Edited	Value
Data collection					
Exclude new files from the Application Catalog and Events Management	*				33 definitions
Policies					
Threat protection excluded applications	*				No definitions
Exclude service accounts from access restrictions	*				On
Agent behavior					
Exclude files from policies (Windows)	*			ⓘ	38 definitions
Exclude files from policies (macOS)		*		ⓘ	1 definitions
