

Importing a CSV file in SAS

Brian Bush - 2025-01-15 - [Horizon VDI](#)

- Ensure the file is in an accessible location, ideally [Mapping a Network Drive to access Data in Horizon](#)
- Open Command Prompt
- Paste appropriate file location link
 - Ex: "c:\Program Files\SASHome\SASFoundation\9.4\sas" -WORK
"P:\yourprojectfolder\temp"
- In SAS, File - Import Data -.csv - next
- Browse for file:
 - Navigate to mapped drive - **yourprojectfolder** - source - All files
- Select the file - Open - Next
- Member: **yourcsvfile** - Next
- Browse to data folder - name the file - Save - Finish
- Navigating back to the TEMP folder and right-click on properties to verify progress
- Data will load in SAS window

Note: **GREY** identifies specific project/data location and will change by project/user
