

Importing a CSV file in SAS

Brian Bush - 2025-01-15 - Horizon VDI

- Ensure the file is in an accessible location, ideally [Mapping a Network Drive to access Data in Horizon](#)
- Open Command Prompt
- Paste appropriate file location link
 - Ex: "c:\Program Files\SASHome\SASFoundation\9.4\sas" -WORK
"P:\yourprojectfolder\temp"
- In SAS, File – Import Data – .csv – next
- Browse for file:
 - Navigate to mapped drive – yourprojectfolder – source – All files
- Select the file – Open – Next
- Member: yourcsvfile – Next
- Browse to data folder – name the file – Save – Finish
- Navigating back to the TEMP folder and right-click on properties to verify progress
- Data will load in SAS window

Note: GREY identifies specific project/data location and will change by project/user
