

## Importing a CSV file in SAS

Brian Bush - 2026-01-29 - [Horizon VDI](#)

- Ensure the file is in an accessible location, ideally [Mapping a Network Drive to access Data in Horizon](#)
- Open Command Prompt
- Paste appropriate file location link
  - Ex: "c:\Program Files\SASHome\SASFoundation\9.4\sas" -WORK  
"P:\**yourprojectfolder**\temp"
- In SAS, File - Import Data -.csv - next
- Browse for file:
  - Navigate to mapped drive - **yourprojectfolder** - source - All files
- Select the file - Open - Next
- Member: **yourcsvfile** - Next
- Browse to data folder - name the file - Save - Finish
- Navigating back to the TEMP folder and right-click on properties to verify progress
- Data will load in SAS window

**Note:** **GREY** identifies specific project/data location and will change by project/user
