

Requesting a VCU Health Email Account

William Crehore - 2024-11-21 - Endpoint

Overview

This process should be completed by a supervisor or HR administrator.

As of 09/01/21 this guide is no longer considered production.

Certain portions of the process have changes as VCU Health has migrated to a new HR management system, Workday.

To find out more about Workday:

https://vcuhealth.service-now.com/sp?id=workday_hub

We have noticed some SOM administrators do not have the necessary access within Workday to onboard new employees.

- **If this is the case, please email HR4U@vcuhealth.org and request access for onboarding SOM employees via Workday**
- **If you do not receive an update from HR4U after 48 hours - please contact SOMTech and we will follow up ASAP.**

Things are changing frequently and we will strive to update this guide as we find out new information.

Entering new SOM employee into VCU Health HR (Workday - Contract Contingent Worker)

Currently, the following screenshot is the best reference guide available for onboarding a new employee into VCU Health HR's Workday.

We're working to confirm that this guide is accurate and up-to-date.

-Will Crehore 9/28/21

Contract Contingent Worker

Managers

The following job aid explains how managers can contract a contingent worker to fill a specific position in their organization.

- In the **Search bar**, enter **Contract Contingent Worker** and select the **Contract Contingent Worker** task.
- Enter the appropriate supervisory organization this contingent worker will report to and then click the **radio button** to select the appropriate pre-hire option. Select the **OK** button.
- Under the **Legal Name Information** section, enter the pre-hire's full legal **First Name** and full legal **Last Name**. Do not use the Preferred Name. The **Country** defaults to the United States of America.
- Under the **Contact Information** section, supply the contact details to create the worker's profile. Select the **Add** button to enter the Phone and Address information. The **Email Address** and **Type** are required. Personal information should be marked as a Home Type, so it is displayed as private and not displayed on the Team Member's Work Summary Page publicly.

In this example, we will select **Create a New Pre-Hire**, as this candidate has not previously worked at VCUHS in the past.

Note: Always search existing pre-hires before creating a new hire to ensure that you are not duplicating records for candidates – even if there is no indication that this is a re-engagement.

- Existing Pre-Hire** – An individual who has previously been added into Workday, typically having already applied to a role in the past.
- Former Worker** – Returning VCUHS Team Member with a legacy worker profile. **Do Not Use** when contracting Contingent Workers.
- Create New Hire** – An individual not yet found in Workday, typically a candidate applying for the first time.

Note: At minimum, an email address must be included to successfully create a pre-hire account and system login. However, the more information you provide, the easier the hiring process becomes further along in the process.

Beyond this point, managers will not be able to update pre-hire records and will need to submit a **Keystone** ticket to make changes.

- Under **Requested For**, enter the new employee's name or non-employee number.
(!) IMPORTANT NOTE (!) - Not all administrators will be automatically listed as an eligible approver in the new system.
 If you (the requestor) are not listed as the Current Approving Manager, then try checking **Alternate Approver Needed** and search for yourself in the Alternate Approver dropdown menu.
 If you are still unable to list yourself as an alternate approver then stop this process and follow up in an email to SOMSecurity@vcuhealth.org (or submit a ticket to us at <https://go.vcu.edu/SOMTicket>).
 We will finish processing the request on your behalf and also investigate adding you as an eligible approver for the future.
- Under **Commonly Requested Items**, check the **Outlook Email & Windows User Activation** options.
- Click **Next** to continue the process.
- The next page is a review of what has been chosen. When you are ready to proceed, click **Next**.

Access Request

6. When the new employee's Windows account has been created, you'll receive an email containing access details.

Subject: RITMxxxxxxx submitted for has been completed.

IMPORTANT NOTE: This email is pertaining to the employee's login information and **not** their actual email account. The email account creation is a separate process that typically takes between 24-48 hours to complete.

RITM **submitted for** **has been completed.**

As an authorized requestor, follow the appropriate step(s) below in order to complete this transaction:
(*DO NOT FORWARD THIS EMAIL DIRECTLY TO END-USERS, as they may not be able to obtain their own credentials via this process. The Requestor is responsible for printing the username and password information and supplying this to the enduser.)

For NEW Windows or Cerner Accounts:

1. Log on to **Keystone** to print [REDACTED] information. Select the correct request (RITM [REDACTED]) and the credentials will appear and be available to provide to your employee.
2. It may take up to 48 hours for Cerner training, if required, to be assigned
If Cerner training is not assigned after this time, contact the Cerner Training Team at (804-827-1266)

For MODIFICATIONS to EXISTING accounts:

1. Notify the employee to log off the network and log back in for the changes to take effect.
2. VCU Health employees do not need to sign an additional confidentiality form.
Non-employees must sign a Confidentiality Agreement that will be provided in a separate email.

Ref:MSG0711144

Store this information for now as it will be used in a later step.

7. You will receive an email notification from someone in the VCU Health Access Management group once the email account has been created.
