

Setup Horizon Native Client on a Personal device

Rebecca Tucker - 2025-01-15 - Horizon VDI

Standard-Sensitivity Environment (Gold Environment)

The VMware Horizon Native Client is recommended for the best user experience.

Steps to Access:

1. Download the Horizon Native Client: Visit the [Omnissa downloads page](#) and select the appropriate version of Omnissa Horizon for your operating system
2. Install and Configure the Client
3. Run the downloaded installer
4. Follow the on-screen prompts to complete the installation

Configure the client with the necessary server details provided by your IT department.

Login and Access:

1. Open the Horizon client
2. Enter your credentials (use your elD@vcu.edu email and **password**) (or select your [vcu.edu](#) account) to sign in to the Standard-Sensitivity environment

For additional information on logging in, please visit: [Connect to Horizon using the Native Client](#)
