About

In October 2019, the SOMTech Notification System was implemented in order to make it easier to send notifications to Windows computers managed by SOMTech. The notifications will look like the window below.

Sample Notification Screenshot

Notifications

SOMTech will list any new notifications in the table below.

Start Date	Title	Subtitle	Message	Comments
20 May 2022	SOMTech Notification	Windows Updates for May	As described on https://go.vcu.edu/SOMPatching, May's Windows patches are currently available for install. These can be manually installed following instructions on the website or they will be automatically installed and the computer will be rebooted on the evening of May 26th (around 10PM). In order for these patches to be applied properly, it's important that you leave any onsite desktop computers on for Thursday night if you do not manually install them. This has been an official notification from SOMTech. To verify its authenticity, please visit https://go.vcu.edu/SOMNotifications or email SOMTech@vcuhealth.org.	Should only be shown to users that have MECM installed.
21 Apr 2022	SOMTech Notification	Windows Updates for April	As described on https://go.vcu.edu/SOMPatching, April's Windows patches are currently available for install. These can be manually installed following instructions on the website or they will be automatically installed and the computer will be rebooted on the evening of April 27th (around 10PM). In order for these patches to be applied properly, it's important that you leave any onsite desktop computers on for Thursday night if you do not manually install them. This has been an official notification from SOMTech. To verify its authenticity, please visit https://go.vcu.edu/SOMNotifications or email SOMTech@vcuhealth.org.	Should only be shown to users that have MECM installed.
