

Survey Tools

Brian Bush - 2022-06-10 - Research Systems

Overview

In addition to the [survey tools provided university-wide](#) (REDCap, Question Pro, Google Forms), the School of Medicine also has a subscription to Qualtrics for research that is best suited on that platform.

Choosing the Right Tool

1. Determine which VCU sensitivity category the data falls into by using the [Data Classification Tool](#).
 1. If the data being collected is VCU Category 1 data, use [REDCap](#).
 2. Otherwise, explore which of the other tools may best meet your needs. The Research Systems team is available for consultations (submit a [Cherwell ticket](#)).
